

About Us:

With funding from the Susan G. Komen for the Cure North Carolina to the Coast Affiliate, the Lee County Health Department is excited to announce its newest initiative:

“Power of the Pink Partnership”

Our objective is to educate and provide screening mammograms to 100 uninsured or underinsured clients age forty and older. Referrals will be made to us from Lee Primary Care, Family Planning Clinic and Helping Hands Clinic. Our project will address breast health needs through education, screening, diagnosis, treatment and follow-up. Power of the Pink Partnership is committed to work cooperatively with the health department, local hospital, physicians, local transportation services, schools, churches and other community health oriented organizations; in an effort to promote breast cancer awareness and early detection screenings.
